

More Teaching Ideas:

From Mitzi Gray: Sharps Safety / Safe Injection Practices in-service. CDC has started a One and Only One campaign to encourage the use of one needle, one syringe with medication administration or irrigations. The website is www.oneandonlycampaign.org. There are posters and brochures along with a 10 minute video that are free. Instructors can also order a free DVD to show in their organizations. The video has healthcare providers reviewing myths related to safe injection practices.

From Datra Delk-Patrick: “In the Year...” As an ice breaker to start a meeting/program, I pass around a small basket with coins. Participants are asked to pick a coin and then introduced themselves and tell something that was happening to them in the year that is on the coin.
